Office Action Summary

Application No.

08/575,433

Applicant(s)

HUANG, LISHENG

Examiner

PHUC H TRAN

Art Unit

2666

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 14 April 2003.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1,4-7,9-11,14-17,19,20,22 and 26-39 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☒ Claim(s) 29 and 30 is/are allowed.
- 6) ☒ Claim(s) 1,4-7,9-11,14-17,19,20,22,26-28 and 31-39 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
- Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
- 11) ☐ The proposed drawing correction filed on _____ is: a) ☐ approved b) ☐ disapproved by the Examiner.
- If approved, corrected drawings are required in reply to this Office action.
- 12) ☐ The oath or declaration is objected to by the Examiner.

Priority under 35 U.S.C. §§ 119 and 120

- 13) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.
- 14) ☐ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. § 119(e) (to a provisional application).
- a) ☐ The translation of the foreign language provisional application has been received.
- 15) ☐ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. §§ 120 and/or 121.

DETAILED ACTION

1. This Non-Final Rejection is responded to the preliminary amendment was field on 8/28/98.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

- 3 Claims 1,4-7,9-11,14-17,19,20,22, 26-28, 31-33, and 35-37 are rejected under 35 U.S.C. 102(e) as being anticipated by Turock (U.S. Patent No. 6243373 B1)

- With respect to claims 1, 6-7, 11, 16-17, 22, 28, 31, & 34, Turock teaches a telecommunications system (Fig. 2) comprising:

an originating circuit-switch network provides originating signals in response to voice input (block 210 in Fig. 2);

an originating gateway computer converts the originating signals into packets of digital data and digital to signal (block 206 in Fig. 2);

a terminating gateway computer, that accepts out of band signaling (col. 2, lines 9-12) and converts the digital data packets into terminating signals or terminating signals to the digital packets (block 216 in Fig. 2);

Art Unit: 2666

a terminating circuit-switched network provides voice output in response to the terminating signals and capable of providing voice input to the terminating gateway computer (e.g. the block 220 in Fig. 2);

and packet-switched network transmits the digital packets from/to the originating to/from the terminating gateway computer (block 214 in Fig. 2), at least on of the originating and terminating gateway comprising a component for routing the digital packets through the packet-switched network from the originating to the terminating gateway computer in response to dialed digits, spoken digits (e.g. blocks 206 and 216 communicate through block 214).

- With respect to claims 4-5, 9-10, 14-15, & 19-20, Turock also teaches wherein the terminating gateway computer comprises a buffer for storing the digital packets prior to the conversion thereof into the terminating signals (col. 8, lines 20-23) and rearranging for a proper packet order (e.g. calls is process in order).

- With respect to claims 26 & 32, Turock discloses wherein at least one of the routing components comprises address resolution logic and a network routing database implement with a central processing unit (block 514 in Fig. 5 and col. 14, lines 39-58).

- With respect to claims 27 & 33, Turock explicitly fail to teach wherein the originating gateway terminal computer includes a component for providing a ring back tone or a busy tone to a telephone connected to the originating circuit-switched network, however, it's well known in the art at the time of the invention was made that a busy tone will send to the callers when the callee's line is busy.

Art Unit: 2666

- With respect to claims 35-38 Turock further teaches providing a caller's address and callee's address to an originating gateway computer in the originating network (col. 6, lines 44-46);

authorizing a call using the caller's address and the routing (col. 6, lines 36-43);

the terminating gateway computer to dial out the callee using the callee's address and the originating gateway computer provide a return tone for advising the callers of a status of the call (e.g. the communication between caller and called).

- With respect to claims 34 & 39, Turock also teaches prompting, via the first gateway device, the calling device for a payment method and validating the payment method prior to transmitting the connection request to the second gateway device (col. 9, lines 27-35).

Allowable Subject Matter

3. Claims 29-30 are allowed.

4. The following claim 34 was indicated allowable by examiner in previous office action; however, these claims are unpatentable in view of new arts. Therefore, these indicated claims are withdrawn.

Response to Arguments

5. Applicant's arguments with respect to claims 1,4-7,9-11,14-17,19,20,22, 26-28, 31-34, and 35-39 have been considered but are moot in view of the new ground(s) of rejection.

Art Unit: 2666

Conclusion

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to PHUC H TRAN whose telephone number is (703) 308-7471. The examiner can normally be reached on M-F (8-4:30).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, RAO SEEMA can be reached on (703) 308-5463. The fax phone numbers for the organization where this application or proceeding is assigned are (703) 872-9314 for regular communications and (703) 872-9314 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 872-9314.
